DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group VII, claims 11-13 in the reply filed on December 1, 2006 is acknowledged. Claims 1-10 have been canceled and claims 14-30 have been added.
2. In view of newly added claims 14-30, the examiner notes that the application contains claims directed to the following patentably distinct species:
 - (1) the step of correcting errors comprising the step of targeting errors via methylation and selective demethylation (claim 20)
 - (2) the step of correcting errors comprising the step of mismatch recognition and cleavage (claims 21, 22, and 26-28)
 - (3) the step of correcting errors comprising the step of generating at least one repair template by disassociation and reassociation of single-stranded nucleic acid molecules (claim 23)
 - (4) the step of correcting errors comprising the step of generating at least one repair template by strand invasion (claim 24)

The species are independent or distinct because these species are directed to different methods for correcting errors.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 11-19, 25, 29, and 30.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1634

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. This application further contains claims directed to the following patentably distinct species:

- (5) the step of mismatch recognition and cleavage is performed by a resolvase or a single-stranded nuclease (claims 22, 27, and 28)
- (6) the step of mismatch recognition and cleavage is performed by a combination of a mismatch binding protein and a nuclease (claims 22, 27, and 29)

The species are independent or distinct because these species are directed to different methods for mismatch recognition and cleavage.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 11-21, 23-26, and 30.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CAR § 1.6(d)).
